GeoForm vs. Survey123

- GeoForm
 - o Web-based
 - o Any device with web browser can use Geoform
 - o Public – no authentication
 - o Cannot be used offline, real-time

- Survey123
 - o Can be branded – logo, color, name (your company's app)
 - o Downloaded from Apple Store/Google Play, etc.
 - o Native code for each device – build once and can run on any device
 - o Contextual menus – i.e. # of people and provide 1 as answer, then Survey123 provides 1 field to fill in name
 - o Designed to be used in offline mode
 - o Requires a named user
